

## emmanuel f. built up a sustainable development policy to reduce its impact on the environment.

We designed an eco-friendly environment with **natural materials and recyclable furniture.**

### **Waste**

- No foils: we do no longer use aluminium foils during the highlight process
- No plastic water bottles: we use a water filtration system
- We use recycled or FSC paper for our prints. We use prints only when necessary.
- Less waste because we sort our waste for recycling

### **Water**

- Reduction of water pollution: using natural and organic products, we reduce chemicals being washed away in water systems. We also reduce the use of pesticides and artificial fertilizers by buying organic products.
- Water saving: we use water efficient toilet and showers. We also train and sensibilise our team to use only the appropriate quantity of water.

### **Energy**

- Energy saving: we use energy saving lights and buy only energy efficient electrical appliances

**Air quality:** *we use green plants to get a good indoor air quality*

We also sourced sustainable and eco-friendly supplies in order to buy as natural as possible: organic cotton & bamboo towels, gowns, eco-friendly cleaning detergents, organic drinks, toxin free paints etc.
